

GREG PAPAY, FAIA

Greg Papay's emphasis on merging the craft and science of architecture creates public buildings and places that are tactile and modern, environmentally responsible and authentic, artful and detailed.

Greg has been with Lake|Flato Architects since 1993. During this time he has had the opportunity to work on a variety of building types ranging from the \$174 million arena for the NBA champion San Antonio Spurs to the School of Nursing for the University of Texas Health Science Center at Houston, which was selected by the AIA as a 2006 Top Ten Green Project. In recent years, creating architecture for education has become Greg's passion. The first two phases of Francis Parker School in San Diego opened this past year and he is designing the new Kingswood Middle School for Cranbrook Educational Community in Michigan.

Greg's design impact at Lake|Flato is not restricted simply to producing architecture. When he joined Lake|Flato 14 years ago, they were a 12-person firm working on small scale, locally focused projects. Under Greg's direction as managing Partner since 1997, Lake|Flato has grown to a firm of more than 60 with a national focus to their design practice, more than 100 AIA design awards, and the 2004 AIA National Firm Award. Greg has hired and mentored dozens of employees, several of which are now Partners in the office.

Greg's efforts to promote design excellence extend beyond his practice and his region. He has lectured and juried extensively in the past decade, advocating for place-based architecture. He has served as the AIA San Antonio president and was instrumental in planning for the AIA National Convention, which was held in San Antonio in 2007.

Greg's work has been recognized with 5 national awards and 6 state and regional awards.

NATIONAL AWARDS

- AIA Top Green Project, 2006
